COMfortel® Headset

The perfect supplement for corded
Auerswald COMfortel telephones

COMfortel DECT Headset: Enjoy mobility without wires!

The professional **COMfortel DECT Headset** offers cordless freedom during phone calls in combination with excellent audio quality. You can leave your desk during a call to check back important information e.g. in the filing cabinet for your customer. Calls can be taken and ended directly on the headset. With a **COMfortel DECT Headset** you can expand your radius to 50 meters. Simply take the caller with you.

Adapt the DECT Headset to your needs!

Directly on the headset the volume can be adjusted and e.g. during an enquiry a call can be muted. Different variants of the ear brackets and the headband allow a convenient and individual wearing comfort. With 7 hours of talk time you can enjoy cordless mobility the whole working day. To prevent your calls from being listened into the transmission between headset and base is digitally encrypted.
