LED Desk Lamp, 80 cm 2400 lm, 16W, Black

The LED desk lamp was designed specifically for modern, spacious workspaces. Thanks to its exceptionally wide light head, it is ideal for dual-monitor setups and provides even, low-shadow illumination across the entire width of the desk. The flexible gooseneck allows for free adjustment of the light—whether for direct lighting during precise tasks, indirect ambient lighting, or spot accent lighting. With up to 2,400 lumens, the lamp delivers impressive brightness that performs exceptionally well even during demanding office or creative work. The color temperature can be adjusted in five steps from a warm 3000 K to a cool 6500 K. Combined with the stepless dimming function, this always creates the perfect lighting atmosphere—whether for focused work, relaxed reading, or video conferences. Thanks to the sturdy table clamp, the lamp takes up very little space and can be securely attached to tabletops up to 65 mm thick. The high-quality housing made of aluminum alloy combined with ABS and PC plastic offers a modern look and a long service life of 25,000 hours. This makes the lamp the ideal choice for home offices, offices, studio environments, and anyone who wants to efficiently and comfortably illuminate large work surfaces.
